

## Create your own mountain animal!

Animals adapt to be able to live in their environment. Come up with your own mountain creature, draw it and explain how your animal has adapted to survive in a mountain biome.

*E.g My animal has lots of thick fur to help keep it warm and protect it from the cold.*

Think about the physical features your animal should have:

- Shorter ears and nose/snout
- Thick fur to keep it warm
- Large paws or hooves for grip

Think about any extra features you might add – it might be horns to defend itself, sharp claws or teeth to hunt prey, camouflaged fur to blend into the mountain. Be creative!
